

## **Negative Feedback vs. Positive Feedback**

### **Unit 1 Anatomy & Physiology**

Mark the following as either negative or positive feedback, and give a brief description explaining your reasoning

- 1. Having a Fever**
- 2. Blood clotting after a wound**
- 3. Shivering when cold**
- 4. Drinking water when you are thirsty**
- 5. Contractions during pregnancy**
- 6. Regulation of heartbeat and respiration during exercise**
- 7. Sweating when it's hot outside**
- 8. Slowed breathing in the presence of carbon monoxide**
