

Job Placement and Continuing Education Rates

2018/19 - 2022/23

For one year after a student graduates, SCTCC asks graduates to report their employment or continuing education outcomes. They are asked to tell us what they are doing and, if they are working, whether or not they consider their work related to their SCTCC field of study. If they are not working, graduates can tell us if they are looking for work in their field.

SCTCC uses the survey results to understand what students do after they graduate. The survey data help us to understand:

- Whether students who complete an AA transfer degree continue their education.
- Whether students available for work in their field are finding jobs they consider to be related to their education.

This report contains several sets of data. Each one has an explanation of what the data represent, or do not represent.

- Continuing education rates of graduates who earn an Associate of Arts degree (AA), which is designed for transfer.
- Adjusted placement rates for students who are available to work in their field.
- Full response sets so readers can see how every graduate responded to the survey without any filters or other caveats.
- Response rates are at the end of the report. We routinely achieve an 85% response rate. Use more caution interpreting the results when response rates are lower than 85%.
 - The information is self-reported by the student or may be provided by a faculty member with knowledge of the student's outcome.
 - * indicates the data are suppressed to protect student privacy

Data Sources

- Graduate Follow-up Survey

Continuing Education Rate of AA Graduates

Associate of Arts (AA) degrees are designed for students to complete their first two years of education at SCTCC then transfer on to earn a bachelor's degree. Some students enter the workforce after they graduate from these programs. That data can be seen in the next set of tables.

Department and Major	Five-year Total

Related Employment Rate by Program

Following the Minnesota State System's methodology, we calculate an *adjusted* placement rate. This rate does not include all graduates. Instead, we calculate the percentage of students working in their field who were available for work in their field. We exclude people not looking for work, continuing their education, or who did not respond to the survey (since we do not know one way or the other what they are doing). This is similar to methodologies that calculate unemployment rates.

Survey Response Rates by Program

The College regularly achieves overall response rates to its survey of approximately 85%. Response rates vary by program from year to year. Higher response rates help to build confidence in the data being reported. In the table, Grads = number of graduates, Resp = number of survey respondents, Rate = response rate.

Licensure Pass Rates

2021/22 - 2023/24

SCTCC monitors licensure or certification pass rates for its programs. These data come from reporting websites or student self-report. The rates are based on students who attempted the licensure, not necessarily on all graduates.

Program	Graduation year								
	2021/22			2022/23			2023/24		
	Attempted	Passed	%	Attempted	Passed	%	Attempted	Passed	%
Dental Assisting	20	19	95%	20	20	100%	22	22	100%
Dental Hygiene	13	13	100%	13	13	100%	14	14	100%
